RESTAURANT SERVICE TROLLEYS

Two ranges of trolleys specially designed for heavy and continuous use in Hotels, Restaurants and Executive Dining Rooms.

The stove enamelled welded steel trolley range is particularly robust and is suitable in situations where strength and load-bearing considerations are of prime importance. The shelves are removable double-sided melamine

The anodised range is more decorative and features attractive pierced gallery surrounds, tubular legs and 4" (10 cm.) smooth-running heavy duty ball-bearing castors. The tray surrounds and the trolley legs are in untarnishable gold or silver finish

KRS/3T
